

X3 4 Lanyard Pin Kit Instructions

-Remove clutch cover

-Install one pin in each screw hole on the housing. Screw them in until you can no longer see the threads on the pin

-Re-install the clutch cover

-Find the four pins that you can reach easiest with your hands. Preferably in the four corners.

-Install clips in to those pins

-Next to the clip, find the flat spot on the cover you can install your leash. See picture bellow. Mark for drilling.

-Remove the cover, and using a 1/8" drill bit drill your 4 holes

-Use a rivet gun to install 1 leash per hole. Use provided washers on the back of the rivet so it does not pull through the plastic.
