

YXZ 1000 Clutch

Pressure Plate

1. Drain oil
2. Remove clutch cover
3. Remove the factory pressure plate assembly.
4. Install the Alba pressure plate and springs. Ensure that the new pressure plate is fully seated against the inner hub.
5. Tighten the 6 fasteners until they bottom. This should be about 5-6 ft. #.
6. Install the new clutch cover gasket. Make sure you clean any gasket material left on the surfaces from the old gasket.
7. **Make sure to use motorcycle grade oil. (not automotive oil).** We use Yamaha Trans-oil Plus or Yamaha 20/50 non-synthetic. We do **not** recommend synthetic oil.

Questions---619-562-0188

Clutch Plate and Fibers

1. Make sure to soak your fiber plates for at least one hour in the same oil that you will be putting in your transmission.
2. Clutch installs the same as your factory clutch.
3. Note: Some of the plates are smaller than the others. Make sure these get installed in the correct order. Check your service manual if you have any questions.
