

## **Alba Racing Beadlock Mud Plug Install**

**Here is a 45 second video showing the install process:**

**<https://www.youtube.com/watch?v=eAWaydxoI5I>**

- 1) The mud plug needs to be pliable. Start with warming the mud plug. You may put this out in the sun for a couple hours or you can use a hair dryer for a minute or two.**
- 2) Roll back the lip a little and take finger (under the lip) 360 degrees going all way around. You are getting your plastic nice and pliable.**
- 3) Tuck the lip of the mud plug under the wheel's beadlock ring. A couple light hits with just your hand will pop it onto the wheel.**
