

ALBA RACING X3 DOOR HANDLE PULLS INSTRUCTIONS

PART # 650-DOORPULL-B

- 1) Start with the drivers side.
- 2) Remove the plastic cover with a T30 torx bit. There is 1 screw that needs to be removed
- 3) Remove the fabric strap by drilling the rivet with a 1/4" drill bit.
- 4) The handles are side specific. See Pic. 1 to see which handle fits the drivers side. Insert it in the cover as shown in Pic. 1
- 5) Using Pic. 2 as an example insert a clevis pin in the hole on the handle. Again, using Pic 2 as an example pull up on the horizontal leg of the latch lever with your left hand. with your right hand put the clevis pin thru the lowest hole in the vertical leg of the latch lever. Install the clevis clip thru the hole in the clevis pin.
- 6) Now install the cover and tighten the torx screw
- 7) Open and close the door several times to be sure the handles are working smoothly.
- 8) Repeat this process for the other side.
